CONTENTS

Section 1 — Laboratory and Clinical Immunology and Inflammation

Co-chairmen: J.-P. BUREAU (Nimes, France)
E. HAEN (Munich, W. Germany)
F. LÉVI (Paris, France)

Circannual modulation of the circadian rhythm of polymorphonuclear cells 1
J.-P. BUREAU, G. LABRECQUE, and M. COUPÉ

Increased evening exposure to cyclosporine and metabolites 5
D. M. CANAFAX, R. J. CIPOLLE, W. J. M. HRUSHESKY, J. T. RABATIN, D. I. MIN, N. M. GRAVES, D. E. R. SUTHERLAND and L. D. BOWERS

Evaluation of various factors influencing the action of mouse α, β interferon on the chemiluminescence of mouse peritoneal macrophages 9
V. CARRIÈRE, P. DORFMAN and M. BASTIDE

Two-dose chronopharmacokinetic optimization of cyclosporine in pancreas transplant patients 13
R. J. CIPOLLE, D. M. CANAFAX, J. T. RABATIN, L. D. BOWERS, D. E. R. SUTHERLAND and W. J. M. HRUSHESKY

Chronobiological aspects of spondylarthritis 17
C. FOCAN, M. ALVIN, V. MAZY, D. FOCAN-HENRARD, F. LÉVI and P. FRANCHIMONT

Alteration of circadian time structure of plasma proteins in patients with inflammation 21
C. FOCAN, B. BRUGUEROLLE, C. ARNAUD, F. LÉVI, V. MAZY, D. FOCAN-HENRARD and G. BOUVENOT

Circadian-stage-specified effects of melatonin on human natural killer (NK) cell activity: *In vitro* and *in vivo* studies 25
G. GATTI, R. CARIGNOLA, R. MASERA, M. LUISA SARTORI, A. SALVADORI, E. MAGRO and A. ANGELI

Circadian-shaped intrarenal cyclosporine delivery 29
S. A. GRUBER, R. J. CIPOLLE, D. M. CANAFAX, J. T. RABATIN, G. R. ERDMANN, P. E. HYNES, J. A. RITZ, F. H. GOULD and W. J. M. HRUSHESKY

Influence of circadian changes in triglyceride concentrations on the pharmacokinetics and experimental toxicity of cyclosporine 31
D. R. LUKE, K. VADIEI and L. J. BRUNNER

Circadian dosing-stage dependence in metabolic effects of ciclosporine in the rat 35
M.-F. MALMARY, K. KABBAJ and J. OUSTRIN

Pain time profile under treatment with Ibuprofen in patients suffering from osteoarthritis (multicenter study) 39
J. MOERCHEL

Chronopharmacologic optimization of oral ciclosporin A (CIA) in mice: A search for a compromise between least renal toxicity and highest immunosuppressive effects 43
A. PATI, I. FLORENTIN, G. LEMAIGRE, M. MECHKOURI and F. LÉVI

Circadian variations of the efficiency of hepatitis B vaccination 45
L. PÖLLMANN and B. PÖLLMANN

Seasonal variations of host resistance and *in vitro* antibody formation of spleen cells from the B6C3F1 mouse 49
H. RATAJCZAK, P. THOMAS, T. VOLLMUTH, D. HECK, R. SOTHERN and W. HRUSHESKY

Section 2A — Neurobiology and Endocrinology

Co-chairmen: G. DARCOURT (Nice, France)
R. REITER (San Antonio, Texas)
W. RIETVELD (Leiden, Netherlands)
Y. TOUITOU (Paris, France)

Further evaluation of the treatment of jet-lag by melatonin: A double-blind crossover study 53
J. ARENDT and M. ALDHOUS

The phase relation of corticosterone and prolactin injections as a factor in the inhibition of hibernation in the thirteen-lined ground squirrel, *Citellus tridecemlineatus* 57
J. T. BURNS and A. H. MEIER

Circadian and circannual variations of plasma calcitonin level in the rat: Influence of sex 61
F. DUCHÂTEL, M.-F. MALMARY and J. OUSTRIN

The circadian pattern of plasma melatonin in anorexia nervosa: Its possible relationships with the pituitary–gonadal impairment 65
E. FERRARI, P. A. BOSSOLO, S. FOPPA, S. COMIS, P. MAGNI, F. FRASCHINI and F. BRAMBILLA

The circadian rhythm of proopiomelanocortin-related peptides in aging 69
E. FERRARI, P. A. BOSSOLO, S. FOPPA, M. FIORAVANTI, M. DALZANO, A. COSTA BARBÉ and F. FACCHINETTI

Regulation of the type II thyroxine-5′-deiodinase circadian rhythm in the rat frontal cerebral cortex 73
J. M. GUERRERO, C. SANTANA, M. PUIG-DOMINGO, A. GONZALEZ-BRITO and R. J. REITER

Circadian rhythm parameters of clinical and endocrine functions in elderly subjects under treatment with various commonly used drugs 77
E. HAUS, G. Y. NICOLAU, D. J. LAKATUA, C. BOGDAN, M. POPESCU, L. SACKETT-LUNDEEN, A. FRABONI and E. PETRESCU

Circadian and ultradian characteristics of plasma growth hormone in children of short stature 81
R. C. HERMIDA, L. GARCÍA, C. LODEIRO and T. IGLESIAS

Biorhythmicity and EEG paroxysmal abnormalities in various forms of epileptic seizures 85
M. F. MONGE-STRAUSS and F. MIKOL

The role of the lateral geniculate nuclei in phasic response to photic and pharmacologic stimuli 89
L. P. MORIN, R. F. JOHNSON, L. SMALE, K. MICHELS and R. Y. MOORE

Testosterone replacement with a circadian pattern 93
V. A. PLACE

Circadian rhythm of type II thyroxine-5′-deiodinase activity in the pineal gland: Controlling factors 95
R. J. REITER, J. M. GUERRERO, C. SANTANA and M. PUIG-DOMINGO

The role of the hypothalamic suprachiasmatic nucleus in methamphetamine induced rhythms in behavior 99
W. J. RIETVELD, J. RUIS and P. BUIJS

Simultaneous study of LH, cortisol, TSH and melatonin in normal subjects 103
P. SCHULZ, J. RENARD, J. WIDMER, R. RIVEST, P. DICK and R. TISSOT

Stimulating effect of 5-methoxypsoralen on the secretion of melatonin 107
E. SOUETRE, L. TAMARKIN, E. SALVATI, G. PACIOTTI, B. KREBS and G. DARCOURT

The circadian body temperature rhythm in estrous rats: Effects of environmental and endocrine manipulations 111
F. SPENCER, H. B. JOHNSON, J. GANES and B. P. HSI

Time-dependent effects ACTH 1–17 on plasma GH and GH–RH in man 113
Y. TOUITOU, A. REINBERG, P. GARNIER, A. BICAKOVA-ROCHER, Y. MOTOHASHI, A. BOGDAN and A. AUZÉBY

Section 2B — Neurobiology and Psychiatry

Co-chairmen: G. DARCOURT (Nice, France)
P. REDFERN (Bath, England)
R. REITER (San Antonio, Texas)
W. RIETVELD (Leiden, Netherlands)
Y. TOUITOU (Paris, France)

Changes from circadian to ultradian periodicities of the axillary temperature in three depressive patients 115
A. BICAKOVA-ROCHER, A. REINBERG, A. GORCEIX, Y. MOTOHASHI and J. NOUGUIER

Chronopharmacologic evaluation of an "antifatigue" preparation. A double-blind, placebo control and cross-over study 119
A. BICAKOVA-ROCHER, A. REINBERG, F. LÉVI, A. GORCEIX, Y. TOUITOU and G. METZGER

Chronic clorgyline alters the wheel-running response of Syrian hamsters to continuous bright light 123
W. C. DUNCAN, P. G. SOKOLOVE and T. A. WEHR

Chronopharmacokinetics of imipramine and its metabolite desipramine in brain and plasma after single and chronic application of imipramine in rats 127
L. HOLLE, Z. GÓRKA, B. LANGNER and B. LEMMER

Destruction of suprachiasmatic nuclei serotonergic fibers alters response of hamster activity rhythms to a monoamine oxidase inhibitor 131
J. S. KRUSE

Time-dependent variations in morphine-induced analgesia 135
G. LABRECQUE, D. LEPAGE-SAVARY and E. POULIN

Chronic antidepressants (imipramine, citalopram, mianserin) differently affect beta-receptor-effector-system in rat forebrain at different times of day 139
B. LEMMER and H. GOTTHEINER

Effects of the antidepressant drugs clomipramine, fluoxetine and mianserin on free-running activity rhythms in the rat 143
P. J. MITCHELL, P. H. REDFERN and J. STOLZ

Section 3 — Theophylline, Bronchodilators and Chest

Co-chairmen: G. D'ALONZO (Houston, Texas)
E. HAUS (St. Paul, Minnesota)
G. KUNKEL (W. Berlin)
J. JONKMAN (Groningen, Netherlands)

Increased nocturnal bronchial hyperreactivity without increased airflow obstruction 147
W. M. C. VAN AALDEREN, D. S. POSTMA, G. H. KOËTER, J. GERRITSEN and K. KNOL

A study of the circadian rhythm of serum theophylline levels (STLs) in asthmatic children treated with three sustained-release theophylline (SRT) formulations 151
A. BACULARD, P. AYMARD and G. TOURNIER

A preliminary study of the circadian rhythm of serum theophylline levels (STLs) in asthmatic infants treated with sustained-release theophylline (SRT) formulation 153
A. BACULARD, J. COUVREUR, B. DUBOIS, P. AYMARD and G. TOURNIER

The utility of the estimated Tw/Ttot in evaluating a long acting sympathomimetic agent used for nocturnal asthma 157
R. P. BAUGHMAN and R. G. LOUDON

Chronopharmacokinetics of theophylline from a once-a-day tablet dosed in the morning and at night 161
C. J. BETLACH, A. B. STRAUGHN, E. J. JARVI, C. F. RYAN, J. C. KISICKI and M. A. GONZALEZ

Circadian chronesthesy of the airways of healthy adults to the β-agonist bronchodilator isoproterenol 163
A. BROWN, M. SMOLENSKY, G. D'ALONZO, H. FRANKOFF, L. GIANOTTI and J. NILSESTUEN

Comparison of the kinetics and effects of sustained-release theophylline scheduled conventionally and once-daily mornings or evenings in adult asthmatics 167
H. FRANKOFF, M. SMOLENSKY, G. D'ALONZO and J. TOMLINSON

Effect of unequal twice daily theophylline on the circadian variation in the expression of β_2-adrenoceptor sites on peripheral mononuclear leucocytes (MNL) 171
E. HAEN, I. LANGENMAYER, H. EMSLANDER, H. HEUSINGER, M. HALLEK and J. REMIEN

Circadian variation in the expression of β_2-adrenoceptor sites in male asthmatic patients 175
E. HAEN, I. LANGENMAYER, H. EMSLANDER, N. WEBER and J. REMIEN

Appearance of circannual variations of different immune parameters in the bronchoalveolar lavage (BAL) fluid in patients with chronic bronchitis after treatment with a bacterial lysate 179
M. HALLEK, B. EMMERICH, R. BUSCH, E. HAEN and H. P. EMSLANDER

A pharmacokinetic model of sustained-release theophylline with circadian rhythmic input and correlated with pulmonary function response 183
A. S. KAPADIA and B. P. HSI

Circadian variations of lymphocyte subpopulations without and with theophylline 187
G. KUNKEL, C. RAUFFUS, R. KUNZE, B. SIEBERT and D. ALBRIGHT

Circadian variations of β_2-adrenoceptors with and without theophylline 189
G. KUNKEL, B. SIEBERT, M. SUERMONDT, R. SPIERER and D. ALBRIGHT

Circadian rhythm in forced expiratory flows in asthmatic children: Modification after bronchodilators (ipratropium and fenoterol) 191
R. LAMY, J. JUST, M. BOULÉ, A. BACULARD, A. SARDET, A. GRIMFELD, G. TOURNIER and F. GIRARD

Effect of a mucolytic agent on biologic rhythms of cough and sputum production 195
R. G. LOUDON and R. P. BAUGHMAN

Comparison of the relationship between two measures of bronchial patency, peak expiratory flow (PEF) and forced expiratory volume (FEV_1), over 24 hr under steady-state theophylline treatment 197
A. A. MELTZER, M. H. SMOLENSKY, G. E. D'ALONZO, R. B. HARRIST and P. H. SCOTT

Periodicities of patient admissions to an emergency department for asthma, chronic obstructive pulmonary disease and/or theophylline toxicity 201
R. W. MORRIS, J. B. LEIKIN, M. K. PATEL and M. ZELL

Chronopharmacokinetic simulation of a circadian rhythm in theophylline disposition during a constant-rate intravenous infusion of aminophylline in the dog 205
R. J. RACKLEY, M. C. MEYER and A. B. STRAUGHN

Oral morning dosing of corticosteroids in long term treated cortico-dependent asthmatics: Increased tolerance and preservation of the adrenocortical function 209
A. REINBERG, Y. TOUITOU, M. BOTBOL, P. GERVAIS, D. CHAOUAT, F. LÉVI and A. BICAKOVA-ROCHER

Influence of different evening intake times of sustained-release theophylline formulation Euphylong° (BY158) on pharmacokinetics and peak expiratory flow values after individual dose titration 213
B. SIEBERT, G. KUNKEL, K. BORNER, H. W. STAUDINGER and V. W. STEINIJANS

Section 4 — General Chronopharmacology

Co-chairmen: P. BÉLANGER (Québec, Canada)
B. BRUGUEROLLE (Marseille, France)
S. NAKANO (Ehime, Japan)
R. STURTEVANT (Maywood, Illinois)

Circadian periodicity in the glutathione concentration of rat liver 215
P. M. BÉLANGER, M. DESGAGNÉ and B. BRUGUEROLLE

Day–night variations in the activity and composition of the microsomal mixed function oxidase of rat liver 219
P. M. BÉLANGER and M. LALANDE

Bupivacaine chronokinetics in man after a peridural constant rate infusion 223
B. BRUGUEROLLE, M. DUPONT, P. LEBRE and G. LEGRE

Temporal variations of membrane permeability to local anaesthetic agents, bupivacaine and mepivacaine, documented by their erythrocytic passage 227
B. BRUGUEROLLE and M. PRAT

Circadian rhythm in serum zinc concentrations in healthy humans 231
J. C. CAL, F. DUMAS, F. PELEN, J. M. RAYMOND, J. CAMBAR and M. AMOURETTI

The mechanism of the chronohepatotoxicity of chloroform in rat: Correlation between binding to hepatic subcellular fractions and histologic changes 235
M. DESGAGNÉ, M. BOUTET and P. M. BÉLANGER

Circadian variations in mice erythrocyte membrane permeability to sodium and potassium 239
C. DORIAN, P. CATROUX, B. BRUGUEROLLE and J. CAMBAR

Insects as animal models for chronopharmacological research 243
D. K. HAYES and N. O. MORGAN

Dosing-time and sex related differences in the pharmacokinetics of cefodizime as well as in cortisol circadian rhythm 247
J. H. G. JONKMAN, A. REINBERG, B. OOSTERHUIS, O. E. DE NOOD, F. A. KERKHOF, Y. MOTOHASHI, F. LÉVI and F. CARANDENTE

Circadian variations of nicotine-induced stimulant effects on ambulatory activity and drinking produced by daily administration in rats 249
T. KITA, M. SHIRASE, H. KONDOH, T. NAKASHIMA and Y. KUROGOCHI

Diurnal variations in the local anesthetic effect of carticaine plus epinephrine (ultracain D-S^{R}) in patients with caries — studies with an electronic pulptester 253
B. LEMMER and R. WIEMERS

Is acetylator phenotype distribution dependent of circadian rhythms? 257
M. OLLAGNIER, J. P. GAY, Y. CHERRAH, H. DECOUSUS and A. REINBERG

Retrospective analysis of non-equidistant pharmacological data 259
R. PIERRE, J. DE PRINS, E. MALHERBE, P. MANCHON and S. MORE

Chronotoxicity and chronokinetics of two local anaesthetic agents, bupivacaine and mepivacaine, in mice 263
M. PRAT and B. BRUGUEROLLE

Diurnal oscillations in salivary levels of quinine following a single dose administration to human volunteers 267
B. RAMESH RAO and D. RAMBHAU

Circadian ethanol exposure related to fetal growth and development in mice 271
I. SAUERBIER

Maturation of circadian behavior rhythms in the first year of human life 273
U. SCHMID, R. LANG, M. HALLEK, D. HEIMER-LANG, M. WERRES, R. SCHMID and T. HELLBRÜGGE

A method for the repetitive collection of small blood samples from unanesthetized rats 277
K. SCHÜMANN, E. RICHTER and E. HAEN

Analysis of variance in human chronopharmacology. An old method in a new area of research 281
K. STEPHAN, R. DOROW, K. WEGSCHEIDER and B. STREITBERG

Section 5 — Ulcerogenesis, H2-Antagonists, Diabetes and Nutrition

Co-chairmen: A. MARKIEWICZ (Katowice, Poland)
J. MOORE (Salt Lake City, Utah)
S. SZABO (Boston, Massachusetts)

Ultrannual rhythm of stimulated gastric acid secretion in duodenal ulcer (DU) 283
J. P. ACCARY, M. MERROUCHE, D. RIGAUD, J. VATIER and M. MIGNON

Nizatidine 300 mg H.S. compared with cimetidine 800 mg H.S. in the treatment of acute duodenal ulcer 285
M. CLOUD and W. OFFEN

The circadian effect of alloxan-diabetes on the timed regulation of hepatic pyruvate kinase from mice 287
R. J. FEUERS, R. A. MITTELSTAEDT, L. E. SCHEVING, T. H. TSAI and J. HUNTER

The suppression of nocturnal acid secretion by H.S. famotidine therapy is sufficient to heal benign gastric ulcers 291
T. J. HUMPHRIES and R. G. BERLIN

Circadian variations in insulin and alloxan sensitivity noted in blood glucose alterations in normal and diabetic mice 295
J. D. HUNTER, J. P. McGEE, J. SALDIVAR, T. TSAI, R. FEUERS and L. E. SCHEVING

Circadian variation of catecholamines excretion and skin basic resistance in children with insulin dependent diabetes 299
D. KIEŁCZEWSKA-MROZIKIEWICZ, A. MROZIKIEWICZ and E. CHMARA

Diet and mealtiming as circadian synchronizers 303
D. J. LAKATUA, M. HAUS, C. BERGE, L. SACKETT-LUNDEEN and E. HAUS

Seasonal variation in the incidence of bleeding ulcer 307
A. MARBELLA, D. GRAHAM and M. SMOLENSKY

Chronosupplementation after gastrectomy 311
A. MARKIEWICZ, H. BOŁDYS, D. SKRZYPEK and J. KALACIŃSKI

Continuous infusion of famotidine maintains high gastric pH in duodenal ulcer (DU) 315
H. MERKI, L. WITZEL, M. LANGMAN, D. KAUFMANN, J. NEUMANN, J. RÖHMEL and R. WALT

Manipulation of feeding schedule can modify the circadian rhythms of toxicity and kinetics of theophylline in mice 317
S. NAKANO, S. OHDO and N. OGAWA

Timing of evening meal and ranitidine administration on patterns of 24hr intragastric pH 321
W. C. ORR, M. ALLEN, A. FINN and M. G. ROBINSON

Circadian rhythms of gastrointestinal peptides in ovariectomized rats: Effects of estradiol and progesterone treatment 323
J. N. PASLEY and P. L. RAYFORD

Effect of seasonal variations on serum neutral amino acids in response to stress in rat 327
A. G. ROBERGE

Effect of seasonal variations on blood parameters in response to stress in cat 331
A. G. ROBERGE and L. THIBAULT

Circadian variation in the pharmacodynamic effect of intravenous ranitidine 335
S. W. SANDERS, J. G. MOORE, K. N. BUCHI and A. L. BISHOP

Circadian dissociation between drug-induced gastric mucosal lesions and gastric secretion in the rat 339
S. SZABO, C. ROGERS and K. J. VENER

Relationship between activity–rhythm shift by daytime restricted feeding and ulcer-development in activity–stress procedure 341
K. WATANABE, C. HARA and N. OGAWA

Section 6 — Cancer

Co-chairmen: I. ASHKENAZI (Tel Aviv, Israel)
C. FOCAN (Liège, Belgium)
R. VON ROEMELING (Lubbock, Texas)
L. SCHEVING (Little Rock, Arkansas)

Twenty-four hour variation in self-administration of morphine sulfate (MS) and hydromorphone (H) by post-surgical gynecologic cancer patients 343
S. E. AUVIL-NOVAK, R. D. NOVAK, M. H. SMOLENSKY, J. J. KAVANAGH, J. W. KWAN and J. T. WHARTON

The role of circadian mitotic control for the promotion of preneoplastic lesions initiated by diethylnitrosamine (DEN) 347
H. BARBASON, B. BOUZAHZAH and M.-C. MORMONT

Toxicities and tissue pharmacokinetics of oxaliplatin and carboplatin depend upon their dosing time in mice 351
N. A. BOUGHATTAS, F. LÉVI, B. HECQUET, G. LEMAIGRE, A. ROULON, C. FOURNIER and A. REINBERG

Circadian cellular proliferation in human rectal mucosa 355
K. N. BUCHI, N. H. RUBIN and J. G. MOORE

Chronotoxicity of anti-cancer drugs: II. Recovery pattern 357
R. CARLEBACH, M. RAVID, L. PELEG, I. ASHKENAZI and Y. KITAY-COHEN

Modulation of the circadian rhythm in methotrexate toxicity in the rat by melatonin and photoperiod 359
J. ENGLISH, G. W. AHERNE and J. ARENDT

Observation of circadian variations of serum thymidine kinase levels in control and tumor patients 361
M. HALLEK, B. EMMERICH, A. REICHLE, H. D. SCHICK, R. SENEKOWITSCH and A. REINBERG

Chronotoxicity of anti-cancer drugs: I. Immediate effects 365
Y. KITAY-COHEN, I. ASHKENAZI, M. RAVID, L. PELEG and R. CARLEBACH

Circadian rhythm in murine tolerance for the anticancer agent mitomycin-C (MIT-C) 367
F. KLEIN, L. DANOBER, A. ROULON, G. LEMAIGRE, M. MECHKOURI and F. LÉVI

Circadian gating of DNA synthesis and its relationship to surgical debulking in human ovarian cancer 371
R. R. KLEVECZ and P. S. BRALY

Etoposide and cisplatin in advanced solid tumors: Results of a study of chronotolerance 373
I. KRAKOWSKI, F. LÉVI, M. MECHKOURI, T. CONROY, E. LUPORSI, B. WEBER and R. METZ

Treatment of childhood acute lymphoblastic leukemia with 6-mercaptopurine: Circadian variability of efficacy, bioavailability and pharmacokinetics 377
G. E. RIVARD, K.-T. LIN, C. INFANTE-RIVARD, J. M. LECLERC and F. VARIN

Differential effect of interleukin-2 on [^{3}H]TdR incorporation into DNA in the thymus, spleen and bone marrow of $CD2F_1$ male mice 381
L. A. SCHEVING, T. H. TSAI, R. J. FEUERS, M. H. SMOLENSKY, J. D. YOUNG and L. E. SCHEVING

A circadian study of cell cycle distribution in non-Hodgkin lymphomas 383
R. SMAALAND, K. LOTE, O. D. LAERUM and Z. VOKAC

Circadian stage not time of day characterizes doxorubicin susceptibility rhythm of mice in continuous light 385
R. B. SOTHERN, F. HALBERG and W. J. M. HRUSHESKY

Profound circadian stage dependence of mitomycin-C toxicity 389
R. B. SOTHERN, R. HAUS, T. R. LANGEVIN, J. A. POPOVICH, M. WICK, R. v. ROEMELING and W. J. M. HRUSHESKY

Clinical chronopharmacokinetics of doxorubicin (DXR) 393
A. SQALLI, J. OUSTRIN, G. HOUIN, R. BUGAT, P. CANAL and M. CARTON

Circadian influence of interleukin-2 in stimulating DNA synthesis in the lung, liver and pancreas of $CD2F_1$ male mice 397
T. H. TSAI, L. A. SCHEVING, R. J. FEUERS, J. D. YOUNG and L. E. SCHEVING

Sources of variability of dihydropyrimidine dehydrogenase activity in human blood mononuclear cells 399
M. TUCHMAN, R. v. ROEMELING, R. M. LANNING, R. B. SOTHERN and W. J. M. HRUSHESKY

Round Table — Drug Delivery Systems and Pumps for Timing Medications

Chairman: W. J. M. HRUSHESKY (Minneapolis, Minnesota)

Chronotherapy of patients with metastatic colorectal cancer with 5-fluorouracil (5-FU) and oxaliplatin (1-OHP), automatically delivered via a programmable external pump. Preliminary results 403
J. P. CAUSSANEL, F. LÉVI, J. L. MISSET, A. DESCORPS DECLERE, R. ADAM, H. BISMUTH, A. REINBERG and G. MATHÉ

Time-modulating controlled delivery of peptide/protein drugs for possible applications in chronotherapy 407
Y. W. CHIEN

Circadian variations of vindesine serum concentrations during continuous infusion 411
C. FOCAN, V. MAZY, J. ZHOU, R. RAHMANI and J. P. CANO

Implantable therapeutic systems 415
J. KOST

Ambulatory 5-day chronotherapy of colorectal cancer with continuous venous infusion of 5-fluorouracil (5-FU) at circadian-modulated rate. Preliminary results 419
F. LÉVI, R. ADAM, A. SOUSSAN, J. P. CAUSSANEL, M. BENAVIDES, J. L. MISSET, F. BURKI, A. REINBERG, M. SMOLENSKY, H. BISMUTH and G. MATHÉ

Pump delivered insulin and home monitored blood glucose in a diabetic patient: Retrospective and chronophysiologic evaluation of 3-year time series 423
A. REINBERG, P. DROUIN, M. KOLOPP, L. MÉJEAN, F. LÉVI, G. DEBRY, M. MECHKOURI, G. DI COSTANZO and A. BICAKOVA-ROCHER

Circadian timing and mode of fluoropyrimidine administration markedly impact organ-specific toxicity and maximal dose intensity 427
R. v. ROEMELING, J. RABATIN, M. TUCHMAN and W. J. M. HRUSHESKY

Feasibility, safety and accuracy of an automated drug delivery system suitable for chronochemotherapy in pediatric patients 431
J. M. A. VAN TORNOUT, M. E. NESBIT, Jr., B. BOSTROM, N. K. C. RAMSAY, S. SOMANI, T. LANGEVIN, R. LANNING, R. VON ROEMELING and W. J. M. HRUSHESKY

Section 7 — Cardiovascular and Renal Systems

Co-chairmen: J. CAMBAR (Bordeaux, France)
H. DECOUSUS (St. Etienne, France)
B. LEMMER (Frankfurt, W. Germany)

Circadian variations in post ischemic acute renal failure in rats 433
P. CATROUX, C. DORIAN and J. CAMBAR

Role of renin angiotensin system in amikacin chrononephrotoxicity 437
C. DORIAN, P. CATROUX and J. CAMBAR

Does the circadian variation of β_2-adrenoceptor sites on peripheral mononuclear leucocytes (MNL) reflect the circadian variation of different MNL subsets? 441
E. HAEN, T. LEDERER, P. RIEBER, P. SCHLEICHER, I. LANGENMAYER, M. HALLEK and J. REMIEN

24-hour variations in the distribution of labeled microspheres to the intestine, liver and kidneys 445
G. LABRECQUE, P. M. BÉLANGER, F. DORÉ and M. LALANDE

Nocturnal blood pressure in sleep apnea, effect of nasal continuous positive airway pressure (nCPAP) 449
J. MAYER, H. BECKER, U. BRANDENBURG, T. PENZEL, J. H. PETER, R. STOOHS, M. WEINER and P. v. WICHERT

Alteration of circadian rhythms of blood pressure by delayed bed-time sleep schedule 453
Y. MOTOHASHI and T. TAKANO

Circadian variation in digoxin pharmacokinetics 457
A. MROZIKIEWICZ, A. JABŁECKA, Z. ŁOWICKI and E. CHMARA

Seasonal variations in gentamicin nephrotoxicity in rats 461
C. PARIAT, P. COURTOIS, J. CAMBAR, A. PIRIOU and S. BOUQUET

Biological rhythms of blood coagulation and of the effect of warfarin in rats 465
G. SOULBAN and G. LABRECQUE

Circadian variation of prohormone atrial natriuretic factors 1–30, 31–67 and 99–126 in man 469
D. L. VESELY, C. J. WINTERS, A. L. SALLMAN, D. M. RICO, J. MEADOWS, B. LeMAY, J. HARRIS, S. D. LUNNINGHAM and V. MELHORN

Effects of different stimuli (isoprenaline, Gpp(NH)p, forskolin) on circadian rhythms in cAMP content and adenylate cyclase activity in the rat heart 473
K. WITTE and B. LEMMER

Author Index 477

Subject Index 481
